

## Expert Perspectives Webinar

### Cellular Energetic Failure: Addressing Unmet Needs and a New Investigational Treatment for ALS and MS

Hosted by Clene, Inc. (NASDAQ: CLNN)

The webinar will feature presentations by two experts: **Professor of Neurology Matthew Kiernan, PhD, DSc, FRACP, FAHMS, AM, MBBS** and **Professor of Neurology Benjamin Greenberg, MD, MHS, FANA, FAAN, CRND**, who will discuss the current treatment landscape and unmet medical needs in amyotrophic lateral sclerosis (ALS) and multiple sclerosis (MS).

Following the experts' presentations, Clene's management team will give an overview of its lead candidate, CNM-Au8, which is a stable, aqueous suspension of catalytically active gold nanocrystals that address cellular energetic failure and oxidative stress by facilitating electron transfer in the brain to increase cellular energy, enhance neurorepair, and improve neuroprotection. Company management will also provide an overview of upcoming milestones, which include the expected release of top line data from the placebo-controlled, Phase 2, RESCUE-ALS trial in the second half of 2021.

Clene's management team as well as Drs. Kiernan and Greenberg will be available to answer questions following the formal presentations.

Wednesday, July 14th

4:30 - 6:00 PM EDT

### Webcast Information

### Expert Biographies

#### **Matthew Kiernan, PhD, DSc, FRACP, FAHMS, AM, MBBS**

Professor Matthew Kiernan leads the Brain and Mind Centre in the area of Discovery and Translation at the University of Sydney and is also the Bushell Chair of Neurology. He has extensive experience in research and academic leadership nationally as well as internationally. He and his team are at the forefront of breakthrough research in human neurophysiology, with his research innovations now in regular use as an adjunct to routine diagnostic testing worldwide. Professor Kiernan is President of the Australian Brain Foundation, immediate past-President of the Australian

and New Zealand Association of Neurologists, and Editor-In-Chief of the Journal of Neurology, Neurosurgery and Psychiatry. He is Chair of the World Federation of Neurology ALS/MND Specialty Group and previously established the Pan-Asian Consortium for Treatment and Research in ALS (PACTALS).

#### **Benjamin Greenberg, MD, MHS, FANA, FAAN, CRND**

Dr. Benjamin Greenberg is an internationally recognized expert in rare autoimmune disorders of the central nervous system. He currently serves as a Professor of Neurology and Vice Chair of Clinical and Translational Research in the Department of Neurology at UT Southwestern. His research interests are in both the diagnosis and treatment of transverse myelitis, neuromyelitis optica, encephalitis, multiple sclerosis and infections of the nervous system. He is actively involved in developing better ways to diagnose and prognosticate for patients with these disorders. Dr. Greenberg received his Bachelor's

degree from Johns Hopkins University and his Master's degree in Molecular Microbiology and Immunology from the Johns Hopkins School of Public Health in Baltimore, Maryland. He attended medical school at Baylor College of Medicine in Houston, Texas. After which, he completed an internal medicine internship at Rush Presbyterian-St. Luke's Medical Center in Chicago, Illinois before going on to his residency in neurology at The Johns Hopkins Hospital in Baltimore, MD.
